

ARAMID PACKING N1706

Composition

Speciale inorganic fibres
Impregnated with PTFE and solid lubricant

Characteristics

The aramid packing N1706 DINACOMB is braided with special organic fibres harder than the aramid. These yarns ensure great chemical resistance and very low coefficient of friction for long time. Each yarn is impregnated with PTFE dispersion and solid lubricant. The pump packing N1706 DINACOMB is the right packing for dynamic applications where is working a classic aramid packing.

Applications

Pump Packing

Tech Data

	P bar	lbf/in ²	Vm/S	f/pm	pH	T°C	T°F
	500	7500	3	600	1 ÷ 13	÷ 260	÷ 500
	25	375	15	3000			

- Never use the product to the maximum temperature and pressure associated. Consult the manufacturer for further information
- The peak temperature can be sustained for short exposures

Aramid Packing N1706

Special pump compression packing made with high tenacity organic fibres coming from aramid, specific for dynamic applications with abrasive fluids

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice. The picture in the DS may not accurately depict the exact color and/or markings of the product.
