

CONTROLLER 3 EVO OXYGEN BAM

Composition

The **CONTROLLER 3 EVO OXYGEN BAM** is comprised of **GR80SGR OXY** braided rings, consisting of expanded graphite wires with a dedicated metal reinforcement. This material ensures minimal weight loss even in the most extreme conditions, meeting the stringent requirements of **EN14772** - section 6.7. BAM approved No. 2-28/2015 E for use with both liquid and gaseous oxygen.

Characteristics

The **CONTROLLER 3 EVO OXYGEN BAM** offers a unique combination of strength and durability, with a low friction coefficient ensuring smooth and reliable operation. Its reinforced structure and the quality of the graphite used make it ideal for high-temperature and pressure applications.

Applications

Specifically designed for industrial valves in oxygen service, the **CONTROLLER 3 EVO OXYGEN BAM** is the ideal choice to ensure effective stem sealing in critical environments. It provides superior performance and exceptional durability, making it essential for oxygen-sensitive industrial applications.

Tech Data

| Maximum Temperature °C | Maximum Oxygen Pressure bar |
|------------------------|-----------------------------|
| up to 60 | 350 |
| >60 up to 300 | 220 |

- Never use the product at its maximum rated temperature and pressure. Consult the manufacturer for further information.

CONTROLLER 3 EVO OXYGEN BAM

The **CONTROLLER 3 EVO OXYGEN BAM** is an innovative gland packing designed specifically for industrial valves in oxygen service. Made from high-quality expanded mineral graphite and reinforced with special metal, this product offers reliable and safe performance in oxygen environments.

Receipt of Order January 5, 2015

Test Samples Sealing material die-formed braided flexible graphite packing Z080SGR OXY batch 1422509, BAM-Order-No.: 2-152 462

Receipt of Samples January 5, 2015

Test Date February 12 to May 29, 2015

Test Location BAM - Working Group "Safe Handling of Oxygen", building no. 41, room no. 073 and no. 120

Test Procedure or Requirement According to DIN EN 1797-2002-02
, "Oxygenic Vessels - Gas/Material Compatibility"
ISO 21010-2014
, "Oxygenic Vessels - Gas/Material Compatibility"
Annex of pamphlet M 034-1 (BG 617-1).

TEST REPORT

The information provided in this publication, as well as that supplied to users in other forms, is based on our experience and communicated according to the best knowledge available. However, since numerous factors beyond our knowledge and control may influence the use of the products, no warranty, explicit or implicit, is given regarding such content. The operating limits indicated do not constitute confirmation that these values can be applied simultaneously. Avoid using the product at the maximum temperature and pressure limits. The maximum temperature is sustainable only for short periods under specific conditions. Specifications may be changed without notice. The images in the DS may not accurately represent the product's color and/or marking.
