## Guardian Performer ICB

The flange insulation set Guardian Performer ICB is specific for Sub-Sea applications.

The Insulation Kits Guardian Performer ICB use a metal support on which the isolation GRE (Glass-Reinforced Epoxy) layers are applied. The main energized PTFE sealing is assisted by a secondary NBR or FKM rubber sealing to ensure maximum system efficiency.

Since the secondary seals are bidirectional they can stop the external pressure from the sea water side while the main seal performs its function containing the internal force.

The Guardian Performer ICB flange isolation kit is applicable up to 200 °C in ANSI 150 - 2500 #, API 2 - 10K # and PN 420 # ratings.

*\* In the standard configuration, the kit is supplied with a SS316L retainer and with insulating sleeves and washers in GRE G10 (FR4).*
