

PLANISTEEL CAMPROFILE UNFITTED

Composition

- NR configuration with special profile
- Metal in accordance with requirements
- Unfitted

Characteristics

Unfitted Camprofile gaskets are designed to provide secure sealing even under critical conditions. The special metal machining with sharp concentric grooves generates high contact pressure, ensuring reliable performance with reduced bolt loads. Ideal for high-pressure and high-temperature industrial plants, they represent a robust, durable, and highly versatile solution.

Key advantages:

- Dedicated solution for oxidizing fluids and elevated temperatures
- No risk of oxidation or filler degradation, as no soft layer is used
- High mechanical strength and dimensional stability
- Long-term reliability under critical operating conditions

Applications

This product is designed for use with high-temperature and high-pressure pipe flanges, particularly those with a narrow sealing surface or limited bolt strength. It also provides a reliable sealing solution for equipment such as mixers, heat exchangers, high-pressure and high-temperature valve bonnets, and autoclaves.

Planisteel Camprofile Unfitted

Maximum reliability, even under the most extreme conditions.

The Planisteel Camprofile Unfitted gasket combines strength with versatility, ensuring perfect sealing even on imperfect flanges and in the presence of high pressures or temperatures. It is the ideal choice for those seeking outstanding performance together with safety and long-lasting flange tightness in industrial plants.

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice. The picture in the DS may not accurately depict the exact color and/or markings of the product.
