

PTFE JOINTING SHEET PLANIFLON™ E12

Composition

• 100% pure expanded PTFE

Characteristics

Planiflon™ E12 gasketing sheets consist of 100% pure, multidirectional expanded PTFE, with practical unrestricted chemical resistance.

When installed the seals made of Planiflon™ E12 plates have an exceptionally good adaptability to flange roughness and nevenness.

In operation, under pressure and temperature loads, high surface pressure is guaranteed. Thereby achieved it has very good stability and tightness, especially in demanding steel flange applications high blow-out security. The good resilience of the material leads to increased operational safety even under changing operating conditions.

Applications

Planiflon™ E12 is suitable for industrial applications to obtain PTFE gaskets for general and specific uses. It has the following certifications:

- TA LUFT

PTFE Jointing Sheet Planiflon™ E12

The bidirectional structured PTFE gasketing sheets Planiflon™ are made with special resins and inorganic fillers. The special processing technique minimizes the material's cold flow, giving to the sheets the characteristic attribute of bidirectionality. The product range of the Planiflon™ includes the following products:

- B13 Modified PTFE with silica filler
- **B14** Modified PTFE with hollow glass microspheres filler
- B15 Modified PTFE with barium sulphate filler
- **B58** Microcellular Modified PTFE layers with pure modified PTFE core
- **B60** Microcellular Modified PTFE with Inorganic fillers
- **E12** Bi-directional expanded PTFE
- B01 Virgin PTFE
- B02 Glass filled PTFE
- **B03** Graphite filled PTFE
