

RAMIE PACKING R4802

Composition

Red ramie yarns
PTFE impregnation
Inert lubricant

Characteristics

Ramie is used for applications requiring robustness and durability. For this reason, it is employed in the production of packings and textile gaskets, taking advantage of its resistance properties, especially in industrial environments that require materials with good chemical and wear resistance.

- **High tensile strength:** it is up to eight times stronger than cotton, making it ideal for industrial and technical applications.
- **Moisture resistance:** ramie maintains its strength even in humid environments, offering excellent dimensional stability.
- **Wear resistance:** compared to other natural fibers, it is less prone to deterioration from friction and wear.
- **Thermal stability:** it can withstand high temperatures without losing its mechanical properties.
- **Environmental sustainability:** as a natural and biodegradable fiber, ramie is considered a sustainable choice.

Applications

Pump packing

Tech Data

	P bar	lbf/in2	Vm/S	f/pm	pH	T°C	T°F
	60	900	2	400	4 ÷ 10	-50 ÷ 120	-60 ÷ 250
	25	375	10	2000			

- Never use the product at its maximum rated temperature and pressure. Consult the manufacturer for further information.
- The peak temperature can be sustained only for short exposure periods.

Ramie Packing R4802

The gland packing R4802 is made with pure Red ramie yarns, impregnated with PTFE and inert lubricant.

The information provided in this publication, as well as that supplied to users in other forms, is based on our experience and communicated according to the best knowledge available. However, since numerous factors beyond our knowledge and control may influence the use of the products, no warranty, explicit or implicit, is given regarding such content. The operating limits indicated do not constitute confirmation that these values can be applied simultaneously. Avoid using the product at the maximum temperature and pressure limits. The maximum temperature is sustainable only for short periods under specific conditions. Specifications may be changed without notice. The images in the DS may not accurately represent the product's color and/or marking.
