

## **RAMIE PACKING R4802**

### Composition

Red ramie yarns PTFE impregnation Inert lubricant

#### **Characteristics**

Ramie is used for applications requiring robustness and durability. For this reason, it is employed in the production of packings and textile gaskets, taking advantage of its resistance properties, especially in industrial environments that require materials with good chemical and wear resistance.

- **High tensile strength**: it is up to eight times stronger than cotton, making it ideal for industrial and technical applications.
- **Moisture resistance**: ramie maintains its strength even in humid environments, offering excellent dimensional stability.
- **Wear resistance**: compared to other natural fibers, it is less prone to deterioration from friction and wear.
- **Thermal stability**: it can withstand high temperatures without losing its mechanical properties.
- **Environmental sustainability**: as a natural and biodegradable fiber, ramie is considered a sustainable choice.

Pump packing

#### **Tech Data**

	P bar	lbf/in2	Vm/S	f/pm	рН	т°С	T°F
F	60	900	2	400	4 ÷ 10	-50 ÷ 120	-60 ÷ 250
<b>®</b>	25	375	10	2000			

- Never use the product to the maximum temperature and pressure associated. Consult the manufacturer for further information
- The peak temperature can be sustained for short exposures

#### Ramie Packing R4802

The gland packing R4802 is made with pure Red ramie yarns, impregnated with PTFE and inert lubricant.
