

# XCTR1 B - CONTROLLER BACK

## Composition

- Expanded mineral graphite, compliant with EN14772 Section 6.7
- Metallic insert A182 F316 (other materials available)

## Characteristics

Gasket set in expanded graphite with variable density and anti-extrusion rings. The XCTR1 B gasket is specifically designed for Ball Valve seats in applications up to class 1500. XCTR1 B is configured to provide approximately 20% compression, ensuring high recovery levels.

## Applications

Expanded mineral graphite can operate across the full pH range, at both very low and high temperatures. The following limitations and exclusions must be considered:

1. With mildly oxidizing agents, hot air, and combustion gases, the temperature must be limited to 450°C.
2. The maximum continuous service temperature is 600°C, with a peak limit of 650°C for short exposures.
3. Graphite is not compatible with strong oxidizing agents.
4. Graphite is suitable for cryogenic applications and oxygen service.
5. The metallic insert must be compatible with the process fluid.

## Tech Data

P bar	lbf/in2	Vm/S	f/pm	pH	T°C	T°F
-------	---------	------	------	----	-----	-----

- The peak temperature can be sustained for short exposures
- With weakly oxidizing agents and hot air the temperature must be limited to 450 ° C
- With steam and non-oxidizing fluids the temperature must be limited to 650 ° C
- Graphite and carbon cannot be used with oxidizing fluids

## XCTR1 B - CONTROLLER BACK

The range of Controller Back graphite seals for the seat includes different configurations to cover the full range of Ball Valve applications.

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice. The picture in the DS may not accurately depict the exact color and/or markings of the product.
