

ARAMID PACKING K6600C

Composition

Continuous aramid yarns PTFE impregnation Lubricant silicon free

Characteristics

The continuous thermostable aramid fiber ensures high mechanical strength and thermal stability, allowing the packing to effectively perform its function even in the presence of aggressive and abrasive fluids. The presence of PTFE dispersion and the inert silicone-free lubricant also ensures constant lubrication and reduces friction between the packing and the pump shaft, improving performance and product life.

Applications

The K6600C aramid packing is the ideal choice for centrifugal and piston pump applications with abrasive fluids. Thanks to its wear resistance properties, this packing is able to provide reliable and durable sealing in difficult conditions. K6600C is the perfect solution for applications that require high resistance to wear. It is recommended to protect the shaft's wear area during operation with K6600C.

Tech Data

	P bar	lbf/in2	Vm/S	f/pm	рН	Т°С	T°F	
F	100	1500	3	600	2 . 12	-100 ÷ 280	-150 ÷ 540	
®	10	150	10	2000	3 ÷ 12		-130 ÷ 340	

- Never use the product to the maximum temperature and pressure associated. Consult the manufacturer for further information
- The peak temperature can be sustained for short exposures

Aramid Packing K6600C

The range of aramid fiber products includes a wide selection of braids and packings that can be used in numerous applications requiring the use of this material. Aramid fiber yarn, both continuous and discontinuous, is used alone or in combination with other technical yarns to produce packings for gland sealing systems, both for static and dynamic applications. The properties of aramid fiber allow for efficient, reliable sealing that can cover a pH range of 3 to 12. Aramid fiber products are available in both dry and lubricated versions and can be combined with other fibers, such as GFO, PTFE, and PBI, or with a rubber core.
