

GRAPHITE PACKING GR8800

Composition

PAN graphite yarns Graphite Powder Passive Inhibitor of Corrosion

Characteristics

The GR8800 gland packing is a high-quality solution for multiple industrial applications. Thanks to its three-phase impregnation with graphite powder and inorganic corrosion inhibitor, the gland packing is able to minimize the risk of stem corrosion and ensure high resistance to high temperatures. The PAN graphite yarn used in the gland packing also offers great elastic recovery that does not regress with aging, ensuring exceptional performance in all'industrial applications, except those that involve the use of highly oxidizing fluids.

Applications

GR8800 is a high-quality graphite suitable for multiple applications, such as industrial valves for steam, hydrocarbons, and petrochemical products, pumps for boiler feedwater, and soot blowers. Additionally, it can also be used with heat transfer oils. However, the use of this graphite should be avoided in applications involving strong oxidizing agents or in the presence of exhaust gases or air above 450°C, as its efficiency is compromised under such conditions. In general, GR8800 represents a reliable and efficient choice for numerous industrial applications where high-quality and resistant materials are required.

Tech Data

	P ba	r Ibf/in2	Vm/S	f/pm	рН	T°C	T°F	
į.	300	4500	1	200				
F	20	300	2	400	0 ÷ 14	-100 ÷ 450 / 650	-150 ÷ 840 / 1200	
®	10	150	10	2000				

- Never use the product to the maximum temperature and pressure associated. Consult the manufacturer for further information
- The peak temperature can be sustained for short exposures
- With weakly oxidizing agents and hot air the temperature must be limited to 450 $^\circ$ C With steam and non-oxidizing fluids the temperature must be limited to 650 $^\circ$ C
- Graphite and carbon cannot be used with oxidizing fluids

Graphite Packing GR8800

The Carrara graphite gland packing product range includes items made with all available graphite yarns, which, according to ASTM F2191 classification, are Type I—Continuous yarn, Type II—Staple yarn, and Type III—Flexible yarn. All graphite gland packings are protected with passive or active corrosion inhibitors (Grade A—Treated with corrosion inhibitor), although untreated gland packings (Grade B-No corrosion inhibitor) are available on demand. The performer and premium grade product ranges include Class 2 items, while the Industrial grade product range offers Class 1 products. Carrara graphite gland packings are specialized for each application, and a proper selection of the item allows for maximizing the sealing performance while reducing the component management costs.
