

Composition

Virgin PTFE

Characteristics

Planiflon[™] B01, the virgin sintered PTFE gasketing sheets, is suitable for all applications where a PTFE gasket without mineral fillers is required. Virgin PTFE gasket sheets, rod and tubes have high chemical resistance (except alkali and hydrofluoric acid).

Applications

Planiflon[™] B01 is suitable for industrial applications, it is available in sheets, bars and tubes to obtain PTFE materials for general and specific uses. It has the following certifications on demand:

• FDA

PTFE Jointing Sheet Planiflon™ B01

The bidirectional structured PTFE gasketing sheets Planiflon[™] are made with special resins and inorganic fillers. The special processing technique minimizes the material's cold flow, giving to the sheets the characteristic attribute of bidirectionality. The product range of the Planiflon[™] includes the following products:

- **B13** Modified PTFE with silica filler
- **B14** Modified PTFE with hollow glass microspheres filler
- **B15** Modified PTFE with barium sulphate filler
- B58 Microcellular Modified PTFE layers with pure modified PTFE core
- **B60** Microcellular Modified PTFE with Inorganic fillers
- E12 Bi-directional expanded PTFE
- B01 Virgin PTFE
- B02 Glass filled PTFE
- B03 Graphite filled PTFE
- B05 Carbographite filled PTFE

The information in this publication, as well as any additional information provided to users, is based on experience and is shared to the best of our current knowledge. However, due to numerous factors beyond our knowledge and control that may affect the use of these products, no warranties are provided or implied regarding this information. The operating limits presented in this publication do not imply that these values can be applied simultaneously. Do not use the product at the maximum temperature and pressure values simultaneously. The maximum temperature is suitable only for short-term exposure under specific conditions. Specifications are subject to change without prior notice.
